

How Do I Select the Best Dumpster and Service for My Business?

LECKE
Waste Services Since 1971

If your business is in the market for a dumpster and waste pickup service, you'll be pleased to know that Leck Waste Services offers Greater Philadelphia's largest and finest selection of commercial dumpsters.

Leck Waste Services' nine commercial dumpster sizes enable our dumpsters to be used in scores of industries. Whether you're operating an office, retail store, service shop, restaurant, apartment complex, shopping mall or any other kind of business, you can trust that our commercial dumpsters and waste management service will meet your needs and expectations.

Most businesses throughout Greater Philadelphia turn to Leck Waste Services for all their dumpster needs. Thanks to our wide-ranging sizes, we'll have a solution your business needs! Let's get started in helping guide your business on the commercial dumpster size perfect for you!

What Are the Different Sizes and Types of Containers Available?

Leck Waste Services' commercial dumpster sizes range from a small 96-gallon toter up to an 8-cubic-yard dumpster for commercial businesses that generate municipal solid waste (MSW).

We also offer 6-cubic-yard to 40-cubic-yard compactors for MSW and construction and demolition (C&D) waste.

Front-Load Dumpster

Our most-popular offering is our front-load dumpsters. These dumpsters are the leading choice for most businesses and designed for midsize to large commercial customers. For most customers, usage of front-load dumpsters is more efficient and cost-effective than usage of rear-load dumpsters, which are designed for use in areas where space is at a premium.

Front-Load Dumpster Dimensions

	2-yard front-load dumpster	3-yard front-load dumpster	4-yard front-load dumpster	6-yard front-load dumpster	8-yard front-load dumpster
Dimensions (HxWxD in inches)	39x71x38	46x71x49	49x71x53	60x71x66	72x71x78
Mobility (able to be mounted on wheels)	Mobile	Mobile	Stationary	Stationary	Stationary
Volume	Low	Low-moderate	Moderate	Moderate-high	High
Fits 30-gallon trash bags	14 to 16	20 to 22	28 to 32	40 to 42	54 to 56
Recommended uses	Churches, law firms, apartment complexes	Repair shops, pizza shops, small factories	Equipment suppliers, retail boutiques	Schools, convenience stores, nursing homes	Shopping malls, office complexes

How Do I Know Which Dumpster Size I'll Need?

The dumpster size that's ideal for your business will depend on many factors. These factors include waste type, volume and your business' operational requirements.

If you have questions about which dumpster size is appropriate for your business' needs, the Leck Waste Services team is glad to recommend a commercial dumpster size for you.

2-yard

FRONT-LOAD DUMPSTER

Our 2-yard front-load dumpsters are ideal for organizations with light waste needs such as small offices

3-yard

FRONT-LOAD DUMPSTER

Our 3-yard front-load dumpsters serving small restaurants such as pizza shops along with repair shops well.

4-yard

FRONT-LOAD DUMPSTER

Equipment suppliers and retail stores often select our 4-yard front-load dumpsters

6-yard

FRONT-LOAD DUMPSTER

Schools and nursing homes opt for the additional space our 6-yard front-load dumpsters provide.

8-yard

FRONT-LOAD DUMPSTER

Finally, our customers operating large enterprises such as shopping malls and office complexes choose to invest in our 8-yard front-load dumpsters for maximum capacity.

How Many Pickups Will I Need?

The type and waste volume your business generates may affect the weekly frequency of required pickups, especially with regard to food waste and other materials susceptible to decomposition.

Some municipalities also require a minimum weekly schedule for food waste generators.

What Items Cannot Go Into My Dumpster?

Items that contain:

- ✗ Asbestos
- ✗ Medical waste
- ✗ Paint
- ✗ Freon
- ✗ Tires
- ✗ Flammable material
- ✗ Electronics

cannot be disposed of in Leck Waste Services' general MSW containers. Additionally, any construction or demolition material—including but not limited to roofing shingles, dirt, brick, block, concrete, or any other masonry material—cannot go into the small containers. These containers may go to different facilities such as a waste-to-energy facility.
